Public Meeting for West Belt Loop Plan Scheduled

Land use, connectivity, and access to be discussed

Construction for the West Belt Loop Road, which will serve as a by-pass between WY Hwy 20/26 and WY Hwy 220, is scheduled for the 2015 construction season. The Casper Area Metropolitan Planning Organization will hold an open house to present the final recommendations on the access management plan for this project. The location of future intersections is the foundation for this access planning study. The meeting will be held Monday, July 7, 2014, 5:30 – 6:30 p.m. at the Christian Church of Casper, 8188 West Zero Road.

“We will be discussing the location of future intersections, because this will be a limited access route,” said Andrew Nelson, MPO supervisor. According to Nelson, a limited access route means there will be no new accesses onto the highway except at pre-designated, future street intersections.

Written comments on the West Belt Loop Land Use, Connectivity, and Access may be submitted during the open house or to:
